

## St. MARY-LE-BOW HAUPTWERK™ version 5 SAMPLE SET SINGLE-CHANNEL SET DOWNLOAD INSTRUCTIONS

There are a total of 3 Data packages and 1 Organ package (SMB-Single-OrganPackage) that need to be installed in order for the multi-channel sample set to load successfully. These data packages are numbered as follows ... 996, 1000, 1004

Please read and follow these instructions carefully and bear in mind that some file sizes are very large and could take some hours to download. It is probably worth using an FTP client such as Filezilla as some browsers struggle with file sizes above a certain amount. A useful tutorial on the operation of Filezilla may be found at [http://wiki.filezilla-project.org/FileZilla\\_Client\\_Tutorial\\_\(en\)](http://wiki.filezilla-project.org/FileZilla_Client_Tutorial_(en)). Note that the installer for Filezilla will probably offer to install additional software which may be unwanted; please review the installation choices carefully and un-tick the appropriate checkboxes as necessary.

If you decide not to use FTP, then either simply click on the first download link (if your version of Adobe PDF reader supports this) or copy and paste the link into your internet browser. Downloading should commence straight away and you should choose to save the file to a suitable location on your hard drive. When the first file has completed downloading, repeat the process for all other files.

For FTP use, note that username and password information is case sensitive – and, as the difference between (for example) a number 1 and a lower case L can be difficult or impossible to tell, copy and paste may be easiest.

Finally, if you have already downloaded and installed the single-channel St Mary-le-Bow Evaluation sample set for Hauptwerk version 5, then you won't need to download Data Package 996 as this will already be installed on your computer.

Whilst downloading the various component packages, it is recommended that you view the user manual for information on installation and loading. The user manual for the St. Mary-le-Bow sample set may be downloaded using the following link:

[www.lavenderaudio.co.uk/smb/smb-user-manual.pdf](http://www.lavenderaudio.co.uk/smb/smb-user-manual.pdf)

For all of the following direct download links, there is no username or password.

### **Data Package 996**

[http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-DataPackage-996.CompPkg\\_Hauptwerk\\_rar](http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-DataPackage-996.CompPkg_Hauptwerk_rar)  
3,125,723,234 bytes - MD5 checksum is 83bd69976ac1ae7365c39813e7feac3c

### **Data Package 1000**

[http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-DataPackage-1000.CompPkg\\_Hauptwerk\\_rar](http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-DataPackage-1000.CompPkg_Hauptwerk_rar)  
3,571,598,173 bytes - MD5 checksum is 9cdb50a31d6b5a7c4b7b7b43d7332598

### **Data Package 1004**

[http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-DataPackage-1004.CompPkg\\_Hauptwerk\\_rar](http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-DataPackage-1004.CompPkg_Hauptwerk_rar)  
3,260,195,879 bytes - MD5 checksum is 7b72dee5ba8f2582d9d15d5c03d2bd6e

### **St. Mary-le-Bow single-channel organ (includes extended organ definition)**

[http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-Single-OrganPackage.CompPkg\\_Hauptwerk\\_rar](http://www.hworgans.co.uk/hw-v-downloads/smb-single/SMB-Single-OrganPackage.CompPkg_Hauptwerk_rar)  
419,872 bytes - MD5 checksum is 2853227a22ca30d836f3ede06940f9dd

The FTP details for the single-channel downloads are (all are in the same folder) ...
